

Great Concrete Seawall For Mission Beach Front

MASSIVE CONSTRUCTION
TO COST NEARLY HALF MILLION
UNANIMOUSLY APPROVED

"The Beach News"

Mission Beach from the bridge on the south to Thomas avenue on the north is to have a sea wall. Plans as drawn by the office of the city manager were unanimously approved and accepted last Monday evening at the meeting of the property holders held in the Harris building. The meeting was presided over by Judge Claude Chambers, who introduced D. L. Bissell of the city manager's office. Mr. Bissell explained the plans, cost and construction of the sea wall. He stated that the front of it would be a solid mass of heavy concrete piling and the wall itself would be of reinforced concrete. There will be a 12-foot concrete walk, with a 21-foot balustrade along the edge on which ornamental lights may be placed at some later time if desired. Steps will lead down to the beach every 300 feet or so.

Division of Expense

Regarding the cost of the wall, it was estimated at about \$40 per foot, or a total estimate of about \$400,000. The assessment of this cost will tentatively be in three divisions. Property between the Strand and the Ocean front will assume 25 per cent of the total cost, plus their proportion on a square foot basis, making an assessment of about 20 1/2 cents a square foot, or about \$270 for an average sized lot. Owners of lots between Strandway and Mission boulevard will be assessed 50 per cent of the remaining cost after the ocean ocean front assessment has been deducted, or about 9 cents a square foot, averaging about \$110 per lot. The third division of the assessments will fall on those persons owning property between Mission boulevard and the bay, and will be about 5 1/2 cents a square foot, amounting to about \$75 per lot. The street railway company will be assessed about 10c a square foot for their holdings.

Parking On the Highway

Mr. Bissell and City Manager Rhodes, who were present, answered all questions in detail regarding the sea wall, as well as other matters dealing with the welfare of Mission Beach. Concerning the matter of parking on the highway, Mr. Rhodes suggested that a communication in the form of a petition from residents of the beach, be submitted to the Council at the next meeting on Monday, July 26, requesting that the drastic parking law be rescinded to allow 30-minute parking on the main highway. This petition was prepared and will be submitted to the council on above date.

MAKING THE BEACH BEAUTIFUL

Mission Beach residents are disciples of the city beautiful as is evidenced by the increase of garden area from month to month. The Nolen plan which was worked upon for some ten years before it was consummated, is being ardently studied by the citizens who will give it an intelligent vote at the near primaries. But there is one citizen among us who gets right down to the elementary detail work day after day. In his quiet way, R. L. Beale is doing his bit faithfully to make the beach a clean and attractive place to live in. Let's greet him in praise the next time we pass him with his stiff fiber sweeper in hand. R. L. Beale is not to be confused with E. W. Beale, our very efficient plumbing inspector.

TOWEL SHOWER FOR BRIDE

Miss Margaret Harris was hostess last week at a towel shower given at her home in honor of Mrs. Llano Briggs. Mrs. Briggs, before her marriage recently, was Miss Elizabeth Asher. The afternoon was spent playing bunco, after which delightful refreshments were served on the card tables. Those present were the Misses Helen Rizer, Francis Lowe,

Fern Leech, Elizabeth and Adele Jackson, Gladys Austria, Aureole Morgan, Esther Baumgartner and Mesdames John Cooley, Louis Almgren and Llano Briggs.

U. OF C. ALUMNI DINNER

One of the most interesting events in university circles was the dinner last Thursday evening of the alumni of the University of California at the University Club in San Diego. The special meeting following the dinner was turned over by courtesy to that polished gentleman, Julius Wangerheim, who recently put San Diego very strongly upon the map by being made president of the entire alumni body, distributed throughout the globe. Mr. and Mrs. E. Paynter of Mission Beach, were among the speakers at the meeting, the latter bringing greetings from the alumni of the University of Missouri, as well as from California.

HAWAIIAN CLUB PICNIC

The San Diego Hawaiian Club held its second annual picnic at Mission Beach last Thursday. The guests roasted wieners about a huge bonfire and the club furnished kona coffee and ice cream. Those who were fortunate enough to be in the vicinity at that time enjoyed a real treat in the exquisite Hawaiian music rendered by the members and guests.

CHURCH SERVICES

Preaching at 11 o'clock in the west room of the school by Rev. D. T. Reed.

Sunday school at 9:30, with good music and devotions. Classes for five departments. Mrs. E. L. Miller, superintendent.

Stationery—FROIDE'S, Bacon st.

SOCIAL NOTES

Mr. and Mrs. Karl F. Bopp, during the week spent here recently entertained at dinner and bridge, the guests being Mr. and Mrs. Chas. J. Donaldson, Mr. and Mrs. Chas. G. Moore and Mrs. Carrier, of San Diego, and Mr. and Mrs. F. Lundblade of Mission Beach.

The Hillcrest Business Men's association and their guests enjoyed a wieners roast on the beach one evening lately.

Mrs. E. L. Miller, county president of the W. C. T. U. of San Diego county, spent the day recently with other county officers at La Mesa. The local Union of La Mesa entertained at that time with a luncheon in honor of the program committee for the preparation of the program for the county convention which convenes at La Mesa August 24 and 25.

Mr. and Mrs. W. H. Joplin of Glendale are spending two weeks at 3801 Ocean Front.

Mr. and Mrs. Walter Tressel and Mrs. Laura Fortner of Los Angeles and Mr. Duke Goetze of Youngstown, Ohio, were the guests of Mr. and Mrs. D. H. Thede over the week-end.

Mr. and Mrs. A. Stimpfing and two sons of Los Angeles are spending the vacation at 826 Salem Court.

Last Tuesday evening Mr. and Mrs. Nat McDowell entertained at the Casa de Mañana with a musicale honoring Judge and Mrs. Edward J. Henning and Mr. and Mrs. George Shaw of Los Angeles. Judge Henning is here to preside over the United States district court which opened this week. Judge and Mrs. Henning, and their daughter, Mrs. Shaw with Mr. Shaw and little son, David, are summering in Mission Beach.

Mr. and Mrs. Chris Schultz have as their guests for several weeks the latter's mother, Mrs. J. E. Dunn and niece, Miss Patricia Walker, both of Los Angeles.

Mr. John L. McCoy of Phoenix, enroute to Colorado to join his wife and family, stopped over a few days this week to visit his parents, Mr. and Mrs. J. D. McCoy.

Mr. and Mrs. Carl Nieman and Mrs. Kate Grove spent last week-end with Mr. and Mrs. Carl Handley of Chula Vista. On Sunday, the entire party motored up to Cuyamaca.

PAVILION BARBER SHOP—Under personal direction of A. H. Maiser. Skillful service, always.

SITE OF THE FIRST PHONE MESSAGE

Walter S. Gifford (left), president of the American Telephone and Telegraph Company, and Leonard H. Kinnard (right), president of the Bell Telephone Company of Pennsylvania and Associated Companies, are shown standing on the exact spot where Alexander Graham Bell first talked over his invention at the Centennial Exposition 50 years ago. In the background can be seen Memorial Hall, relic of the Centennial, and which is now being used as a museum. It was on this spot that Don Pedro, then Emperor of Brazil, met the 29-year-old inventor and exclaimed, "My God, it talks!" when he heard Bell's voice come over the wire. The exhibits to be staged by the organization these men represent will be one of the great features of the Sesqui-Centennial International Exposition, which opens in Philadelphia June 1 and continues to December 1 to celebrate the 150th anniversary of the signing of the Declaration of Independence.

'Why I Want To Go To France'

CALIFORNIA'S SONG

ENTERED IN NATIONAL CON-

TEST OF AMERICAN LEGION

(Special to "The Beach News")

Indianapolis, Ind., July 23.—Verses of unusual merit have been accepted from a California American Legionnaire, Henry H. Brown, post historian of Sacramento Post No. 61, and entered in the Legion's national contest on the subject, "Why I want to go to France with the American Legion in 1927," the rules of the contest being broadened to include poetry.

Three prizes have been donated, first, \$350; second, \$150; third, \$100, by the French Line Steamship company, which will carry the California Legionnaires to France in September, 1927, from the port of New York. The winners will be chosen by three judges of national prominence, William Allen White, Richard Henry Little and Frederick Palmer. Those eligible to compete in the contest are members of the American Legion and the American Legion Auxiliary.

The contest opened June 1 and will end November 15, the date having been changed from September 15. The following poetical essay has been marked by the contest editor of the France Convention Committee of the American Legion at the National headquarters in Indianapolis, Ind., and is considered one of the best yet submitted.

'WHY I WANT TO GO TO FRANCE'

"I want to go again to France across the briny ooze,
And worry not about the subs that Heinie loved to use—
I want to hear some gob ree-harse, 'You can't stand there, you know,
And then I'll batten down the hatch with all the gob below."

"Within those dinky Quarante Hommes et Huit Chevaux, Oh Man,
I want to pack the soldiers in like sardines in a can—
I want to pull the whiskers of the pompous Chef de Gare
And then to double time a mile to get him out of air."

"I want to draw a billet in a burg way down the pike,
Four hundred miles or so from where the G. I. cans alight,
And then I want to go up front and learn the bloody 'How'
Of ways to dodge a hand grenade and go without my chow."

"I want to march through sunny France, to stagger through the slush
As down my neck the gladsome rain goes gurgling with a rush—
I want to flop down in a hole where mustard gas is there,
'Tis much the better 'ole, you see, with shrapnel in the air."

"And then I want to wave my arms and cry, 'Le Guerre is o're,
And hit my buddy on the back and then to yell some more,
I want to follow Heinie home with all those pals of mine,
And be again an actor in the 'Watch Upon the Rhine.'"

"Ah, yes, I want to go again to fields where poppies grow,
And kneel for just a moment mid the crosses, row on row—
To pledge anew that meed of Faith to those who sleep in God,
That they may rest in perfect peace beneath the Flanders sod."

"I want to go to Old LeMans and try to find a bunk,
And, failing, sleep upon a truck half filled with German junk,
Next day to hie me on quest to find the nearest Gare
And grab a peanut grinder that will haul me far from there."

"I want to go to old Gironde, ere orders call me back
And parley voo with Antoinette, the belle of Podensac—
I couldn't parley worth a darn but Antoinette was wise
And what she couldn't say with lips she whispered with her eyes."

"Oh, yes, I want to hit Paree and take the wife along
To show her how I fought the war with beaucoup wine and song—
She'll learn a lot about the war that she has never known—
Ye Gods! I guess I'd better try to make the trip alone."

—Henry H. Brown.

Five Points Fast Becoming New Industrial Center

Watch The Waters!

HIGH TIDE SCHEDULE

FOR FOUR DAYS

Saturday, July 24—Low, 3:02 a. m., 1 foot; high, 9:13 a. m., 4.4 feet; low, 2:12 p. m., 1.9 feet; high 8:27 p. m., 7.2 feet.

Sunday, July 25—Low, 3:42 a. m., 1.2 feet; high, 9:45 a. m., 4.6 feet; low 3 p. m., 1.8 feet; high 9:12 p. m., 7.3 feet.

Monday, July 26—Low, 4:23 a. m., 1.2 feet; high, 10:35 a. m., 4.7 feet; low, 3:48 p. m., 1.7 feet; high 9:58 p. m., 7 feet.

Tuesday, July 27—Low 5:05 a. m., 0.9 feet; high, 11:19 a. m., 4.8 feet; low, 4:42 p. m., 1.8 feet; high, 10:47 p. m., 6.5 feet.

HIGHEST TIDES DUE

THIS SUNDAY NIGHT

The beach and bay sections of San Diego are scheduled to get the highest tide of the year this Sunday night and the year's lowest tide next Monday morning. The highest tide will occur at 9:12 p. m. when a mark of seven feet three inches will be set. The lowest tide, coming the morning after the high tide will occur at 4:23 o'clock and will set up a mark of minus one foot seven inches. The high tides began last Thursday evening, with a 6.6 ft. mark, and rise higher each night until the peak is reached tomorrow night.

LAST DAYS HERE

FOR REGISTRATION

In order to vote at the August primaries and the forthcoming fall election you'll have to be registered. The registration books will be closed at the end of next week. Register now!

GRANADA THEATRE, LA JOLLA

This Saturday, July 24th, matinee and night, the Granada theatre in La Jolla is offering Hoot Gibson, ace of the saddle, in "The Arizona Sweepstakes." This picture features one of the greatest saddle races of all times, a cross-country epic that will bring you to your feet cheering the reckless brilliant riding of Hoot and his famous Universal Ranch Riders. It is Gibson's greatest display of horsemanship. Helen Lynch is the girl and the picture is adapted from the story by Charles Logue. A Grantland Rice spotlight, a comedy and a review will also be shown.

The much heralded Denny opus, "Skinner's Dress Suit" will be the feature attraction for Sunday and Monday. This picture was originally advertised for earlier in the month, but thru some mishap was misshipped, failing to arrive, and "Rolling Home" was substituted for it. "Skinner's Dress Suit" is considered by many to be Denny's greatest laugh picture. Laura La Plante, a star in her own right, plays opposite Reginald Denny, and patrons of the Granada on Sunday and Monday have in store for them two of the most enjoyable hours they have ever spent. An Educational comedy, a Kelly color and a News reel also appear on the program.

Clara Bow, flapper extraordinary, carves her niche in the screen hall of fame, with her splendid work in "Dancing Mothers," the feature for Tuesday and Wednesday. The picture, which is a Paramount production features Alice Joyce, Conway Tearle and Clara Bow. Alice Joyce, Conway Tearle and Clara Bow give excellent performances. The picture will long be remembered for its dramatic climax and novel ending. A Mazie comedy and a Fable will also be shown.

On Thursday and Friday "Ella Cinders," Colleen More's latest picture, will be shown. "Ella Cinders" is the screen adaptation of the comic strip of the same name, and presents Cinderella in the movies. Lloyd Hughes plays opposite the winsome Colleen. "Somewhere in Somewhere," a Roach comedy and a news reel will also be shown.

NEW PALOMAR LAUNDRY

OCCUPIES COMMANDING SPOT

AT ENTRANCE TO CITY

Situated at the corner of Pierce street and Kettner boulevard in the busy and rapidly-growing five-points centre, where traffic from the north and south joins to enter San Diego, the new Palomar Laundry has begun operations with every augury of substantial success. The building is a magnificent business structure, especially designed for laundry work and the equipment comprises the latest machinery for modern service. The interior is snow white with cerulean blue trimmings and the entire surroundings bespeak the very ultimate in cleanliness and orderliness. In speaking of the service, General Manager C. E. Daigneau says it will be of the highest type and patrons will "appreciate the difference." The New Palomar Laundry gives special attention to patronage of the beach and bay districts. Their phone number is Hillcrest 7028.

Photographs—Froide—Bacon St.

SATISFACTION ASSURED AT

FIVE POINTS SERVICE STATION

BY MANAGER ROBERTSON

Strategically situated, on the coast route in and out of San Diego, where traffic joins from Point Loma and the beach districts, the Five Points Service Station is open from early morn till midnight. Proprietor Walter M. Robertson states that a specialty is made of first grade gasolines, oils, tire and battery service at his fully equipped station at the corner of California and Moore streets. His phone number is Hillcrest 6881 and prompt attention is assured all customers, every effort being made to meet the requirements and satisfaction of the most exacting patron.

MESSENGER SERVICE

FOR YOUR CONVENIENCE

In order to accommodate the people of Ocean Beach and Mission Beach who often want a small errand done, we have now established a MESSENGER SERVICE to fill this need. Just call Bayview 0186-J when you desire a messenger for errands of any kind. FROIDE, 1868 Bacon St., Ocean Beach. Advt.

FINED THOUSAND DOLLARS ON LIQUOR CHARGE

W. H. Jennings was fined \$1000 in police court last Tuesday on two charges of violation of the Wright act. It is recorded that nearly two hundred gallons of alleged moonshine were found between false walls of a house occupied by Jennings at 4951 Cape May avenue, and the arrest of Jennings on charges of violating the Wright act, featured an early morning police raid in which Police Sergt. George Churchman, Patrolman Woudstra, Rochefort, Oder, Little and Bowe, participated.

Kodak Finishing—Froide—Bacon St.

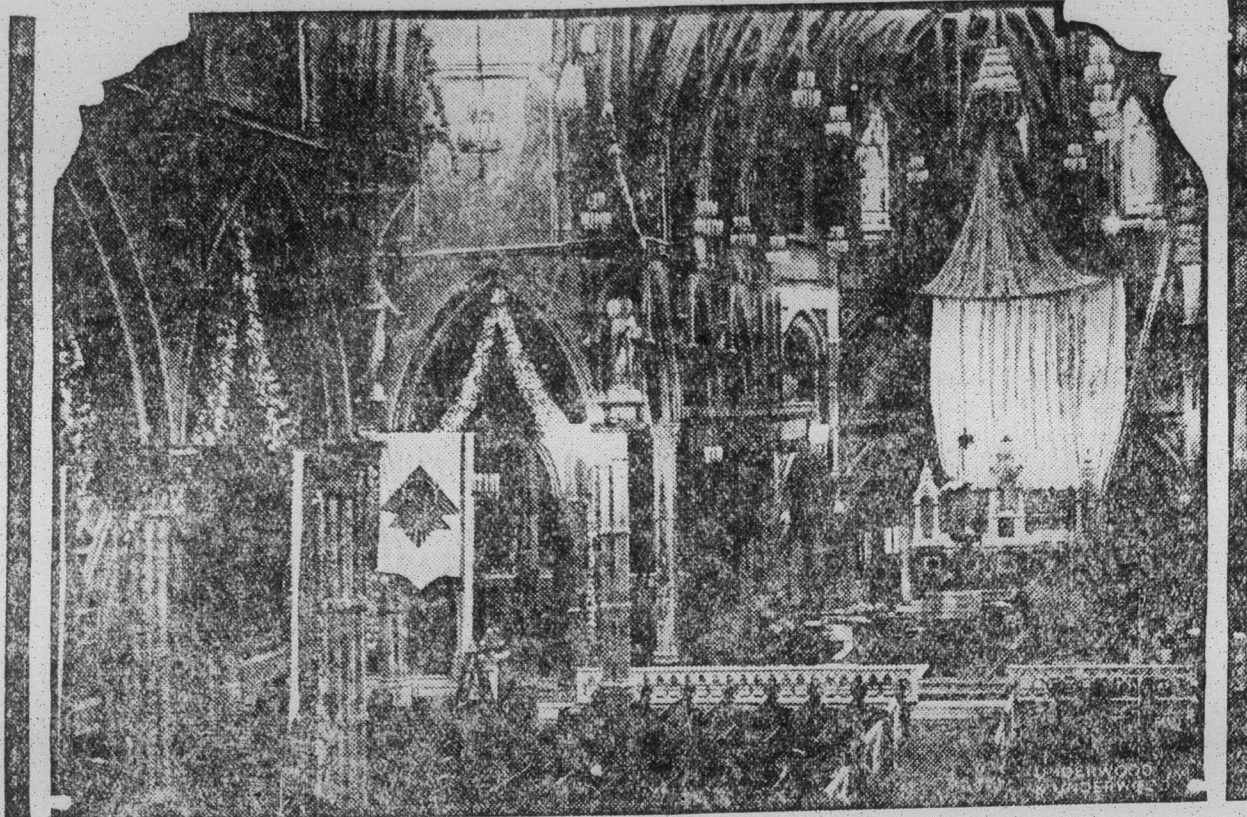

FRED HERTEL OPENS SUNSET

CLIFFS SERVICE STATION AT

DE FOE AND NEWPORT

Since his recent purchase of the buildings at the corner of DeFoe and Newport avenue, Fred Hertel has made some striking changes in the property. The cottages have been moved and improved and a modern service station for motorists has been erected on the corner with in and out driveways from both thoroughfares. Proprietor Hertel specializes in high grade oils and gasolines, with a full line of the "Shell" products, and announces that batteries are tested free. Mr. and Mrs. Hertel have moved here from their former home in National City and are residing in the house adjacent to the corner service station. The phone number is Bayview 0368-W and prompt and satisfactory service is always assured.

Cathedral Decorated for Eucharistic Congress

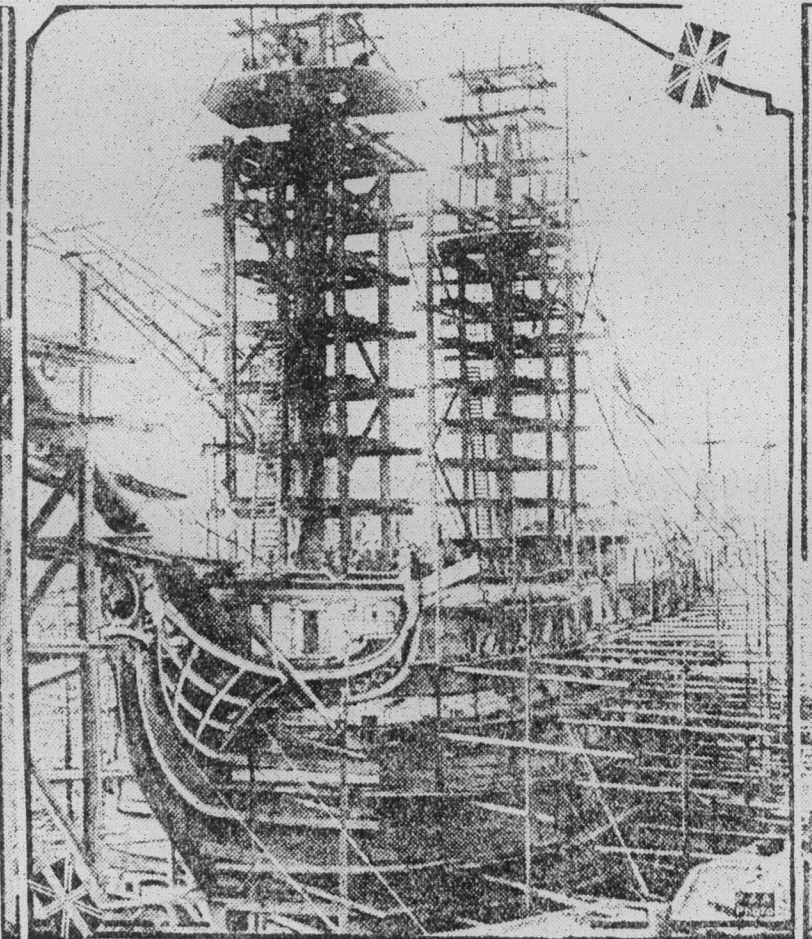

Interior of Holy Name cathedral, Chicago, lavishly decorated for the celebration of the first mass of the International Eucharistic congress.

Great Pageant at Valley Forge Anniversary

The historic field of Valley Forge, where the heroes of the Continental army passed a terrible winter, again stirred beneath the feet of soldiery commemorating the 148th anniversary of Washington's evacuation of the encampment. The pageant was held under the auspices of the sesquicentennial exposition. Photograph shows the Centennial Legion and all the other historic commands present assembling for a parade and review.

Rebuilding Nelson's Old Flagship

Lord Nelson's famous old flagship, the Victory, is now in course of reconstruction at the Portsmouth dockyard, England. She is shown above surrounded by scaffolding from truck to keelson.

Real Hospitality in Metz

President Doumergue of France kissing one of the pretty native girls who came out in force to welcome him on his recent state visit to Metz.

CALIFORNIA NEWS BRIEFS

An old hunting rifle which belonged to Abraham Lincoln came to light among the early day relics at Sutter's Fort, when the historic fortress and museum was visited recently by the Rev. Ig Chief Horse Eagle, 104-year-old Indian evangelist and friend of the martyred president. The aged redskin, internationally known as a revivalist as well as an Oklahoma chieftan who has smoked the pipe of peace with every American president since Lincoln, was visibly moved when the ancient rifle was discovered and placed in his hands. The weapon, according to information available here, was used by Abraham Lincoln and Mr. Wilson during a hunting trip in 1848. Among California's forty-niners was "Mr. Wilson" and with him came the Lincoln rifle which happily found its way into the state collection of historic mementoes of the past.

Memories of the old days when the heroine at the risk of her life stopped a wildly plunging runaway team, were revived at Etna recently when Mrs. M. H. McCarthy, wife of the editor of the Western Sentinel, risked her life to stop a runaway. It was not a team, but a runaway automobile. The risk, however, was equally as great. The car, being cranked, jumped out of control and commenced a wild plunge down the hill on the main street. Sensing that the car would strike other automobiles and possibly cause a fatality, Mrs. McCarthy made a flying leap into the machine, grabbed the wheel and, throwing on the brakes, stopped the car as it threatened to crash into a row of parked vehicles, some of them occupied.

Work is well under way on the new \$8000 expansion program at the Tulare County Fairgrounds at Tulare. The first project is construction of a high fenced inclosure around the new six-acre addition to the grounds which was recently purchased. The next step will be laying of paved sidewalks along the front side and main entrance to the fairgrounds. A number of other improvements are to be made later, but prior to opening of the annual fair in this city in September. The Tulare chamber of commerce each year adds to value of the grounds, spending \$14,000 in a similar program last year.

Municipal ownership and operation of the water plant in Clovis has proven a success from the very inception in 1914 when the city voted \$25,000 in bonds two years after incorporation. At the same time the city voted a like sum for a sewer system. So successful has been the municipal water ownership venture experienced by the city that all extensions and additions to the water service have been taken care of without the levying of a tax. The profit has been approximately \$3,000 per annum, sufficient to take care of the needs as the city grew.

Not satisfied with having driven across the continent and back in twenty-three actual running days, Wilbur Baldwin, 21, of Roseville is anxious to try a non-stop trip across the continent next summer and break a record. Baldwin, who lost both arms two years ago in a railroad accident here, covered 7,899 miles in his recent trip across the continent, which started as a publicity stunt for a make of automobile, but ended in a personal tour. Baldwin, by means of artificial arms, did all the driving.

Delhi is destined to become the home of the Silver King squab, besides the many other phases of agriculture carried on in the district and colony. This recent phase of farming is being developed in the fourth unit or Balco district by C. J. James, formerly of Hayward, who recently located here. He was engaged in the coast city in operating a large pigeon farm, consisting of 2,000 pairs of pigeons, which he is moving to Delhi, expecting to carry on in an extensive way the marketing of squabs.

The Napa State hospital had added more equipment with which to facilitate the handling of products grown on the hospital holdings for distribution among the patients of the institution at a considerable saving to the state. The latest project is a cannery which has been equipped on a basis sufficiently large enough to handle the fruits taken from the hospital orchards. A new rotator has been secured and a modern sealing machine has been installed.

Aid from one of the national organizations established for the purpose of erecting hospitals is to be sought by the Richmond chamber of commerce in the erection of a hospital in Richmond, according to plans discussed at a recent session of the board of directors.

A hundred workers of the Betz Packing company, the concern that will pack the output of seven large packing houses of the Sebastopol Apple Growers' Union, will receive \$90,000 in wages during the harvest season, which last about six weeks.

The American Legion's memorial hall now under construction at Merced, will be completed by August 14, according to a statement made by Emmett McNamara, commander of the post. A crew of interior workmen will arrive shortly. The building will cost in excess of \$50,000 and will be dedicated this fall.

The prevalence of Volstead act violations comes in for special attention this year in safety advice for summer vacation bathers issued by the state board of health. "Don't drink liquor and then go bathing," warns the board.

MANAGER FOR DAD

Miss Lucille Kirby, Petersburg, Ill., is believed, is the first woman senatorial campaign manager. She has been appointed by her father to take charge of his campaign for United States senator from Illinois, as a candidate of the "drys" in opposition to George Brennan of Chicago. Miss Kirby graduated from the Woman's college at Jacksonville, Ill., on June 1, and has won six oratorical medal contests.

SWEDEN'S VOLSTEAD

Dr. Ivan Bratt of Sweden, whose individual ration system has helped in the solution of the wet and dry problem of his country.

Unrestricted Output

"Senator, is the world growing better?" "If it isn't, we can easily pass some more laws."

Construction has begun on another new packing house for Shafter, Kern county.

Organization of a municipal band in Oroville is being sponsored by the Achaean Club of that city.

Services were recently held at Live Oak for the laying of the cornerstone of a new \$15,000 Methodist Episcopal Church.

At a price of \$12,500 the directors of the Cloverdale chamber of commerce purchased the old Citrus Fair association's pavilion.

Plans have been inaugurated by Karl Ross Post of the American Legion aimed at securing the 1927 state Legion convention for Stockton.

Organization of a volunteer fire department for the town of Gerber, has been completed. A fire siren has been ordered and will be installed soon.

The new community hall just completed at Coloma, was formally dedicated with a ball and community entertainment Saturday evening, July 3.

Approximately 4,000 delegates recently gathered in Stockton in attendance at the thirty-ninth annual convention of the California Christian Endeavor Union.

Work has started on the new \$150,000 plant of the Exchange Orange Products company, on its recently acquired ten-acre site in the industrial section of Ontario.

The large reclaimed acreage below Schellville, Sonoma Co., known as the Jones ranch, owned by the Sonoma Land company, has produced a fine crop of hay this year, but the prices are low.

Counties in northern California are organizing solidly behind the California Farm Bureau Federation campaign to place the modified federal plan of state legislative reapportionment on the ballot.

A new Masonic temple, consisting of a lodge building and theatre, has just been completed at Roseville at a cost of \$250,000, and is declared by leading architects to be one of the finest buildings of its size in the state.

The Williams and Colusa Parlor, Native Sons of the Golden West, will consolidate at a meeting held at Colusa July 13th. This will make Parlor No. 69 one of the strongest Native Sons' Parlor in northern California.

Construction of the Phillbrook valley dam in Butte county, at a cost of \$250,000, is soon to be undertaken by the Pacific Gas & Electric Co. The dam will store 5,000 acre feet of water to be used in power generation at the Centerville and De Sabia plants.

Friends and neighbors of Alvin Johnson of Delhi, gathered in his alfalfa field recently and did a service for him by putting up his hay. Johnson was stricken with diphtheria recently, causing him to abandon his labor in the fields.

Orange growers of the Lugonia section of Redlands suffered a loss amounting up into thousands of dollars this year by floods washing through their groves. They plan to form a district and join with the city in constructing a storm water ditch system to care for future flood waters.

Boycott labels are being used by field workers of the state board of health. It was announced in a campaign to abolish the common drinking cup. Wherever the walking delegates of cleanliness and sanitation see a tin cup hanging on a chain he licks and sticks a label reading: "Don't drink from this cup—it may carry disease."

The sum of \$750 was realized from the benefit dance given on an open-air platform in Roseville for William Newsome, high school boy of Yuba City, who suffered a fracture of the backbone in an automobile accident. The goal is \$1,000, and friends will continue their efforts, as that sum is considered necessary to assure the patient the proper care and medical attention.

The Anderson, Clayton company of Los Angeles and Dallas, has commenced construction of a cotton gin at Merced. The plant, embodying the latest improvements in ginning machinery, will have a maximum capacity of 50 bales each day and will be completed by September 1. The cost is estimated at nearly \$50,000. The gin will probably take care of the product of 5,000 acres this year.

California can grow anything that grows in Florida, and that goes even for alligators. Armed posses were reported searching near Jackson, Amador county, for a large alligator seen in a reservoir which schoolboys use as a swimming hole. The saurian is believed to be the property of Dr. E. E. Endicott. The physician bought a baby alligator six years ago and it escaped shortly after its delivery at Jackson.

Announcement that the state government has spent \$62,995.05 during the last two years, in efforts to bring about return to California of persons who decided they liked other states better was made today by the state board of control. The state will not spend money on every deserter of California sunshine, however. The money in question was used in extraditing murderers, robbers, burglars, forgers and other persons charged with felonies.

A contract was awarded for the erection of a twelve-room addition to the Washington school and a six-room two-story addition to the McKinley school in the San Leandro school district. The improvements will be of reinforced concrete and will cost \$135,000.

With a view to facilitating buying and selling of fresh fruit in Tulare county where contracts are made between producer and buyer, the Tulare County Farm Bureau has adopted a standard fruit buyers' contract of which are available at the farm bureau office at Visalia.

STRANGE DIALECT COSTS MAN EIGHT YEARS IN PRISON

Alien, Misinterpreted at Trial for Murder, Is Given Parole.

Newark, N. J.—An interpreter's error caused Raffaelo Morello of this city to pass eight years in prison, and would have resulted in life imprisonment had the error not been disclosed several weeks ago, after action by the New Jersey state court of pardons.

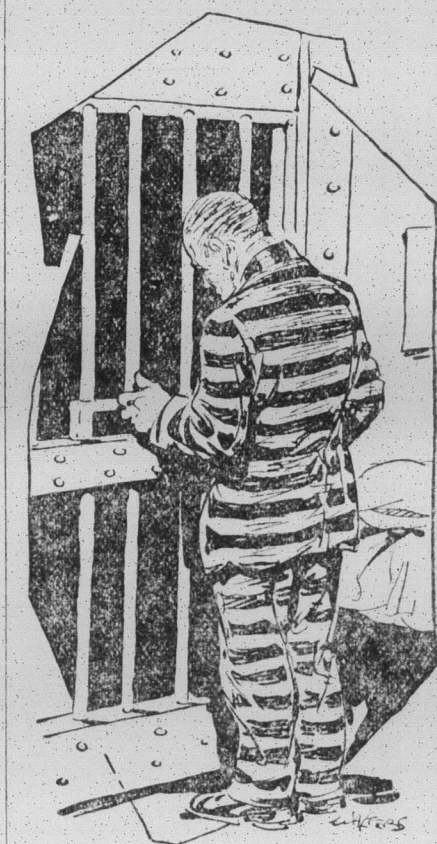

Largely it was his inability to speak or understand English that sent Morello to prison for life for the murder of his wife—so the court found in its decision to parole him. But it was Morello's own eagerness to learn the language of his adopted country, once he found himself behind the bars that perhaps made the mills of justice grind a bit more surely.

Nine years ago Morello and Annette, seventeen, his bride of four months, were happy in their home in Newark. The war was on and eventually Morello, who had taken out first citizenship papers, received an order to report to the Newark draft board.

Ignorant of English, Annette sensed the meaning of the notice and hid it from her husband's eyes. Annette pleaded with him not to leave her—better suicide together than that, so the testimony at Morello's trial revealed.

"I could not look my fellow workmen in the face if I did not go," Morello told his wife. "I must go. My country has called."

He scoffed at his wife's threat to kill herself. November 27, 1918, husband and wife went to spend the night with her father, Francesco

Sent to Prison for a Crime He Did Not Commit.

Arditi. It was to be their last moment together for some time, for the next day Morello was to report at camp—to be enrolled in the national army.

Early in the morning, Arditi and his neighbors heard two shots. They rushed into the room occupied by Morello and his wife, Mrs. Morello was dead, a bullet in her forehead. Morello was unconscious beside her, a bullet through his ear. In Newark city hospital the husband recovered. He was indicted for first degree murder. At the coroner's inquest, Morello in an Italian dialect, strange to Joseph Frederici, official interpreter, was supposed to have admitted his guilt. He was tried and found guilty by a jury which recommended mercy to Essex county Judge Martin. Judge Martin sentenced the apparently uncomprehending Morello to life imprisonment.

Studies in Prison.

In prison he eagerly attended the prison English classes. To the few friends who visited him from time to time he protested his innocence in his new language. His friends engaged Harold Simandl, an attorney of Newark to make an investigation. Frederici the interpreter, admitted that Morello's statements at the inquest were susceptible to two interpretations, either "she wanted it done," or "she did it." In his prison language the prisoner insisted that his wife had committed suicide and he tried to kill himself. Because of this "false interpretation," the court of pardons decided to parole Morello.

Surgeon's Shears Give Patient Pain in Stomach

Berlin.—Operated upon thrice for stomach ulcers, the last time two years ago, a male patient in the Cologne hospital at Berlin, Germany, developed severe pains in the stomach after the third operation.

An X-ray revealed a pair of shears in his stomach. The instrument which the doctors had failed to remove is now in two parts, necessitating a most difficult operation to remove it.

Hens as Alimony

Knoxville, Tenn.—Alleging cruel and inhuman treatment, Mary Jesse Douglas has filed suit for divorce. She asks as alimony 18 hens, a rooster and a motor truck valued at \$300.

MICKIE, THE PRINTER'S DEVIL The Bugaboos Will Have to Step

Daddy's Evening Fairy Tale

By Mary Graham Bonner

JUNIOR BACON'S HELP

Since the time when Brother Bacon had had such a scare from the old wolf and had been almost afraid that he was going to be a breakfast for a Mrs. Wolf, he had been a very good pig and had stayed at home in the pig pen.

Of course you must remember that this was not the father Brother Bacon. This was the original Brother Bacon's son, and even he was growing up now.

Yes, his adventures were scarcely over before he seemed almost too big to tell of them as little pig adventures.

Brother Bacon's son was sometimes called Junior Bacon, and sometimes just Brother Bacon. It was easy enough to tell them apart.

Sometimes they were called Big Brother Bacon and Little Brother Bacon.

But I think it will be easiest if we say Brother Bacon Junior, or else Junior Bacon.

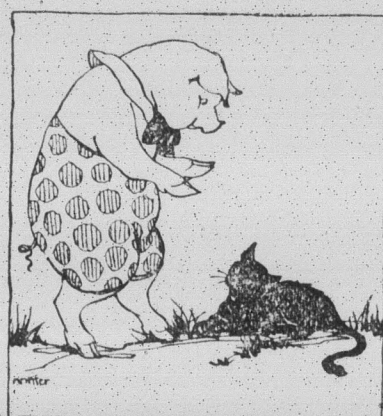

Maybe we will decide on the last name as being the shortest of all.

"Mother," squealed Junior Bacon one morning, "Mother Pig!"

"What is it?" asked his mother. "I thought you were not going to bother me any more."

"Well," said Junior Bacon, "I would like to take a sun bath."

"That shows some sense, anyway," said the mother. "I agree with you."

"Good Morning," He Grunted.

great grandfather Porky, I do not like these pigs who want to take baths in water or who are willing to be clean. "I cannot understand using water when there is mud, cool, wonderful mud."

Mother Pig grunted with delight thinking about it.

"Well, then may I go, mother? There is a black creature over in the barnyard taking a sun bath just where I'd like to go."

"He looks like a nice creature. He just sleeps in the sunshine. He doesn't seem to chatter and talk the way some of the silly animals are forever doing."

"You're doing enough chattering yourself," said his mother, "but that is like some creatures who say other things talk too much when they're apt to talk all the time themselves."

"But be off now, and that black creature is a good, lazy cat. You may lie down in the sunshine near him."

Off went Junior Bacon to the spot where the cat was.

"Good morning," he grunted. "How are you, may I ask?"

"Me-ow, I'm well; you may ask that, but don't bother me any more. I must sleep all the afternoon. Nothing could wake me up now."

A song sparrow had been flying nearby, and had been very anxious to get some crumbs that were lying around the barnyard. Now, when Mr. Song Sparrow heard the cat say that nothing could wake him up, he began to hover very near the crumbs.

Soon he stooped and picked up a crumb in his beak, but with a bound the cat was off—and almost, almost got him by the tail. Just in time, though, Junior Bacon had given a great squeal of fear and the song sparrow had flown off.

"Me-ow," snarled the cat, "can't you leave me alone?"

"I never touched you," grunted Junior Bacon. "My life was saved once—and I don't object to birds."

"They're not my best friends. They're too high above me."

"But you shouldn't kill them. Why don't you sleep as you said you wanted to do? Now, if you disturb me again, I'll leave you."

"A pig is not such fine company," snarled the cat angrily as he pretended to take another nap.

But the song sparrows were grateful indeed to Junior Bacon and his squealing warning which had saved them from the cat.

No Hope

"Oh, Mister Officer, I've lost my doggie."

"That's all right. Put a want ad in the paper."

"Oh, but Patsy can't read."

All's Well!

Mother—Johnnie, see what the baby has in his mouth.

Johnnie—It's all right, mother, it's only a safety pin.—Good Hardware.

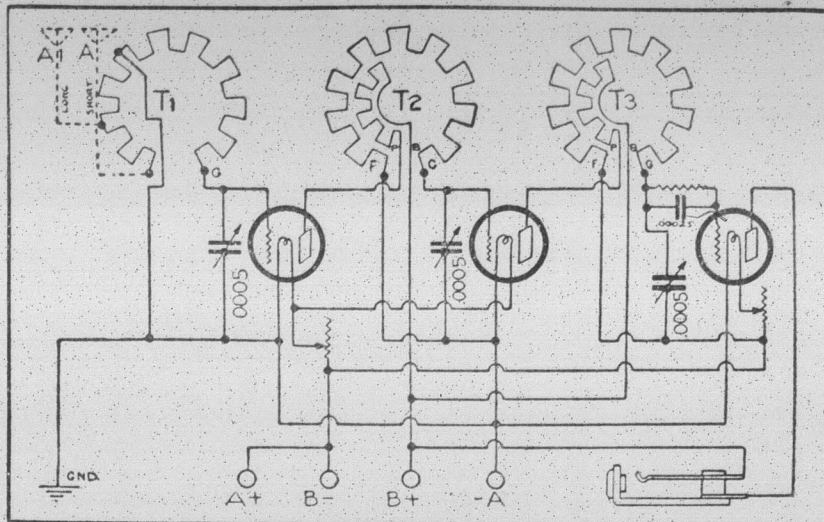

Revised Version

Little Girl (telling her mother about the party)—And Uncle Dick recited "Curse You."

Mother—"Curse You?"

Little Girl—Yes. "Curse You Shall Not Ring Tonight."

RADIO

Three-Tube Receiver, Square Wound Toroid Coils, Two Stages of Radio Frequency and Detector. Can Be Enlarged to Five-Tube Set.

By CARLTON E. BUTLER

(Member American Institute of Electrical Engineers and Institute of Radio Engineers.)

Styles in radio receivers have changed with the changing conditions of the broadcasting field. A three-tube regenerative set with two stages of radio frequency amplification was capable of giving satisfactory reception a few years ago, but today, with the worst congestion of the ether lanes ever experienced in the history of radio, and the increasing use of high-power broadcasting stations, selectivity requirements demand the use of radio-frequency amplifying circuits.

A three-tube circuit today should use some form of tuned radio-frequency amplification that successfully copes with 1926 conditions and furnishes an inexpensive set that later on may be enlarged into a five-tube receiver by the addition of two stages of audio-frequency amplification.

Leave Room on Panel.

In the diagram shown here, however, just the three-tube circuit is illustrated as it makes a complete set in itself. Room should be left on the panel and in the cabinet for the other stages at a later date. For this reason a 24 or 26-inch panel should be used, with a cabinet and baseboard large enough to allow for this future expansion. The three-tube set will bring in just as much distance and possess all of the desirable qualities of the high-priced five-tube sets on the market, excepting volume, which is obtained when audio amplification is added.

Little apparatus is needed to construct this set, and with reasonable care an excellent receiver can be had for very little outlay of time and money. To construct the set you will need the following list of apparatus:

- 1 square wound toroid coil, type T1.
- 2 square wound toroid coils, type T2, indicated as T2 and T3.
- 3 straight-line frequency variable condensers, .00035 mfd. capacity. Indicated as C1, C2, and C3.

How to Avoid Burning Out Your Radio Tubes

"An ounce of prevention is worth a pound of cure," applies nowhere more forcefully than in the burning out of radio tubes. A simple measure to eliminate, as far as practicable one of the wastes of radio is proposed by the manager of a prominent radio manufacturing company. An ordinary 40-watt lamp is all that is needed to conduct the operation, resulting often in saving of time and money, and at other times "making assurance doubly sure."

"Did you ever hear the story, 'I've burned out five tubes'?" Mr. Manager asked in discussing the matter with a group of dealers. "Now there is no occasion for this happening. If, of course, may be possible because of an internal short in one of the tubes between the grid or plate and the filament; or possibly through carelessness in installing the receiver and connecting the battery wires."

"The wise dealer, however, or the one installing the set, always connects up every receiver and uses an ordinary 40-watt, 110-volt lamp, for instance the kind you ordinarily have in the store or find in the home, in series with the plus 90 'B' battery lead when the receiver is installed for the first time."

"With this precaution, it is impossible to burn out tubes, for even if there is a defect of any kind in either the receiver or connections, the tube filaments will only glow or light up very dimly with the 40-watt lamp connected in the plus 90 'B' battery leads, and then only when the filament control switch is still on its 'off' position."

"If the tubes do light with the switch in the 'off' position, it is a direct indication of trouble, and the receiver should be immediately disconnected and the fault found and eliminated."

"Always use that 'safety valve' 40-watt lamp in series with 'B' battery for it assures absolute protection to the tubes. When the set is completely hooked up and working properly, you can safely remove the lamp and still know that the set will function properly, and that there will be no possible chance of burning out tubes under normal operating conditions."

Battery Charging Rate

A storage battery will not have a long life if it is charged at a rate greater than six amperes, and in the case of small batteries three amperes is enough.

1 .00025 mfd. fixed grid condenser and 2 megohm grid leak 25-ohm rheostats.

1 phone jack.

3 tube sockets.

Binding posts, wire, screws, etc.

The 25-ohm rheostats are to be used with CV 201-A or C 301-A type of tubes. If the 199 type are to be used, then 40-ohm rheostats should be substituted. For the WD 11 or WD 12 type of tube, 6-ohm rheostats throughout will be correct. Both radio-frequency tubes are operated from one rheostat if desired, but it is usually best to have a separate control for the detector tube.

Use Double Circuit Jack.

The detector tube is using the same voltage of "B" battery as the radio-frequency tubes. This will only be possible as long as all three tubes are of the same type and not more than 45 volts are to be used. If a higher voltage of "B" battery is desired, then the detector jack should be supplied from the 45-volt tap. If a soft tube is to be used, reduce the voltage to 22½ volts, or less.

A single-circuit jack is shown in the detector stage. If at a later date it is practically certain that amplification is to be added, it is best to use a double-circuit jack in this position to avoid the need for changing the present circuit.

Two antenna terminals are provided on the first toroid coil. These are to adapt the set to a long or short antenna. It might be well to bring these two terminals out to binding posts on the rear of the cabinet so that the antenna can be quickly changed over from one to the other as conditions require more selective tuning, or greater volume is desired.

The position of the apparatus in laying out the receiver baseboard is not critical. The coils may be placed side by side without intercoupling or causing the receiver to become unstable, due to their confined magnetic fields.

Amount of Power That Your Aerial Picks Up

It has been computed that the amount of power picked up by the ordinary receiving aerial is about one-billionth of a fly-power. Think of it! If your receiver picked up as much power as that possessed by a fly, you would be receiving a billion times more energy than you are now receiving. It seems almost impossible to comprehend this fact. Here is another illustration that may help you to understand how very small is the power actually picked up by your antenna. If the power radiated by the average transmitting station were collected and used to heat an ordinary electric toaster it would not even glow at a dull red heat and certainly would not burn your bread. Yet this small amount of energy is radiating in all directions and spreads over a circle with a diameter of 16,000 to 20,000 miles, for signals have been picked up hundreds of times at points 8,000 to 10,000 miles distant from the transmitting station.

Just imagine every foot of space in a circle with a radius of 10,000 miles being flooded with part of the energy that originally was only enough to heat an electric toaster, then you begin to get an idea of the extremely small amount of energy that reaches your particular aerial.

From this it will be realized that to detect the extremely faint signals from distant stations your receiver must be very sensitive and efficient.

Uncle Sam's Radio Job Has Grown Since 1911

Uncle Sam's job of supervising all the radio broadcasting outfits of the country has grown rapidly since 1911 when this service began. In that year there were but two men enforcing the radio laws. Today there are 19 in the headquarters office in Washington and 70 in the field watching over the 18,103 licensed amateur and commercial stations in this country and on United States ships. It is estimated that 25,000,000 people have access to radio equipment with which to receive broadcast programs.

Value of Colored Wires

Colored battery connections are good vacuum tube insurance. Obtain wire in several different colors or dip the ends in dye. When taking the wires off the set merely note the position of the various colors and when reconnecting place them the same.

A "Correct" Likeness of Washington

This heroic statue of the commander-in-chief of the first armies of the United States was made for the city of Portland, Oregon, though not yet delivered there by the artist. The western municipality has loaned it to the Sesqui-Centennial International Exposition, opening in Philadelphia June 1 and continuing until December 1, to celebrate 150 years of American independence. At the foot of the sculpture is shown Pompeo Coppini, the sculptor. Dr. Henry Waldo Poe, of Portland, declares the face to be the most correct likeness of Washington ever modeled.

Purity of Milk Protected Now By Scientists

By KATHRYN ST. JOHN

Careful housewives constantly make it a point to ascertain the quality of each item that goes on their tables. Preparing food for the family is an extremely important job, for the proper selection and preparation of foods make in a large measure for the health and happiness of the family.

Milk is the most nearly perfect food, but it is a very delicate one as well. The keeping qualities of milk are slight. Danger from contamination is ever present. Evaporated milk, which is double rich because of the removal of 60 per cent of the water, is science's solution to these conditions.

Safeguarding evaporated milk is worked out as perfectly as man's ingenuity has been able to make the process. From cow to can, the milk which goes into the evaporated product is watched every step of the way.

Cows of the dairy herds are guarded with constant care and are subjected to regular inspections by veterinary surgeons. Herds are carefully groomed, and their yards and barns are kept scrupulously clean, as are all utensils. Milk condenseries are located in the heart of the big dairy regions to facilitate speedy handling, for this is essential if the milk is to be canned at "its moment of maturity." Canvas-covered trucks haul the milk to market, thus protecting the product from contamination on the way. Arriving at the condensery, the milk goes through tests for acidity, sediment, flavor and butterfat content before it is accepted.

Experts watch the progress of the milk through every step of its way. It goes into the evaporating machine; to the homogenizer, which breaks up the fat globules so that the milk may be easily digested by the consumer; by way of the almost human filling machine into sterilized cans; then into the sterilizer, where the cans are surrounded by steam and boiling water, destroying any possible bacteria. Inspectors handle the product as the last step to see that the canning job has been perfectly done. Labeling and packing follow. The housewife obtains the milk as fresh and sweet as when it came from the cow.

Young At 60, Or Old At 40? Diet Decides

Women are as old or as young as their state of health. A woman may be young at sixty years or old at forty. It all depends on her physical well-being.

Youth and beauty have a foundation in sound health. And food is easily the most important item in health. In giving consideration to the subjects of diet and beauty, women should not forget the food essentials that make for the preservation of teeth, hair, figure and complexion.

Blame for round shoulders, flat chest and poor teeth among women is due in large measure to faulty diet, or, specifically, to a lack of lime and phosphorus. Milk, or evaporated milk, which is simply cow's milk with 60 per cent of the water taken away, is especially rich in lime.

Because of the concentration of evaporated milk, which is regulated by government standards, it is of

double the richness of ordinary market milk, as is shown in the following table:

Ordinary Milk.	
Fat	3.5 to 4.5 per cent
Sugar (lactose)	4.5 to 4.75 per cent
Proteins	3.5 to 4 per cent
Minerals	7 to .75 per cent
Evaporated Milk.	
Fat	7.5 to 8.2 per cent
Sugar (lactose)	9.5 to 10 per cent
Proteins	7.5 to 8.2 per cent
Minerals	1.4 to 1.6 per cent

A quart of milk a day for adults is recommended by doctors not only because of its high mineral content, but for the reasons that it helps keep the digestive tract in proper condition, strengthens the body to resist disease, and gives proper balance to the diet. Salads also play an important part in the dietary. Some sort of a salad, lettuce, tomato, fresh fruit, cabbage or vegetable, should be eaten at least once a day. Neither is the daily menu complete without a generous quantity of coarse, leafy vegetables, valuable for their high vitamin content. Fruit juices also have very beneficial properties.

If a woman follows out the rules of diet, birthdays to her will be nothing more than an excuse for a celebration.

BALBOA THEATER

"The Palm Beach Girl," which
comes to the Balboa Theatre Sunday,
Monday and Tuesday is a rapid fire
mixture of mirth and motion, further
enlivened by the most exhilarating
and refreshing performance Bebe
Daniels has ever contributed.

Fanchon & Marco present Don Bar-
clay comedian of the Ziegfeld Follies,
Charlie Hoff the Norwegian, and the
world's pole vaulting champion. Hoff
has a dancing partner Joyzelle.

Jackson Murray—Baritone from
the Kolb and Dill production of "A
Pair of Fools" will also contribute to
the program.

For those who choose their film
fare on the basis of dramatic strength
of story, excellent characterization,
pictorial beauty and able direction
should make it a point to see "Sea
Horses," the Paramount spectacle-
melodrama that comes to the Balboa
Wednesday, Thursday, Friday and
Saturday. Advance reports hail it
as the best production of its type the
current season has produced.

A "Fanchon and Marco Idea" will
present David Murray and Gilda Lee
with Ernest Morrison and Baby
Annette one of the cleverest children
on the stage. George Stolberg and
his Greater Band Band will furnish
a program of fine musical numbers.
The News Reel and other short reels
complete the program.

CABRILLO THEATER

"The Wilderness Woman," which
comes Saturday to the Cabrillo Thea-
tre here, is an adaptation of the cele-
brated Saturday Evening Post serial
story by Arthur Stringer. Robert T.
Kane made the picture for First National
release.

Aileen Pringle, Lowell Sherman
and Chester Conklin have the feature
roles. Miss Pringle appears in her
first character comedy role, bringing
a new and refreshing personality to
the screen.

Lowell Sherman, instead of appear-
ing in his customary role of the
heavy, walks off with the laurels of
the hero in "The Wilderness Woman,"
while Chester Conklin, the walrus-
moustached comedian, is afforded
plenty of opportunities to get in his
laughable work.

Not the least important character
in the picture is a year old bear. Miss
Pringle, in her role of the Alaskan
miner's daughter, brings the animal
with her to New York, and the com-
plications that follow must be seen
to be appreciated.

Robert Cain and Henry Vibert also
have important parts in the picture.
The story was adapted from the origi-
nal by Paul Bern and Paul Schofield
and directed by Howard Higgin.

Raymond Godden will play a group
of popular musical selections on the
organ. Kinograms and a comedy
complete the program.

"COLONEL ROUNDABOUT" REVIVES HAPPY MEMORIES

Commenting in his customary interesting style on the past and present as seen, heard and remembered, "Colonel Roundabout" had the following paragraph in his "Union" column yesterday:

"Who remembers when Kitty Kirkham sang at Tony Pastor's 'Bill Bailey, Won't You Please Come Home'?"

Oh, yes, Harry, we remember it most happily. Kitty Kirkham was the stage name of the present Mrs. Kirk Smith, now residing in Ocean Beach and wife of the editor of "The Beach News," and it is recalled she also won the reputation of being the first singer to bring "Good-bye, My Blue Bell," to the Pacific Coast from New York, appearing with marked success at the opening of "Pantages' original Orpheum theater in Seattle, Wash.

TO ENTERTAIN NEWLYWEDS.

Mrs. St. Clair Brown will entertain at a reception musicale this Sunday afternoon, July 25, at her home, 1052 Fourth street, in honor of her son and daughter-in-law, Mr. and Mrs. Elino D. Briggs, popular young local couple, whose marriage was an interesting event of this month, and who have just returned from their wedding trip. Mrs. Briggs was formerly Miss Elizabeth Asher, attractive daughter of Mr. and Mrs. J. M. Asher of Pacific Beach.

ANNUAL FLORAL VISIT

"The San Diego Floral association held its regular monthly meeting Tuesday, July 20, in the Floral building in Balboa park. At this meeting, members had the pleasure of hearing an illustrated lecture on Hawaii by Miss Kate O. Sessions, who has recently returned from a visit to that interesting land. Through the courtesy of Mr. and Mrs. A. D. Robinson, the association will make its annual visit to Rosecroft, on Point Loma, Tuesday, July 27, from 2 to 5 p. m.

WORKING FOR UNCLE SAM

Howard W. Lane, formerly employed at G. H. Faber's grocery store, No. 1, has been appointed as mail collector and carrier in San Diego. Mr. Lane and his family will retain their home at 4603 Santa Monica avenue.

MOTORED FROM NORTH

A son was born July 8 to Mr. and Mrs. Dean C. Walker of 4944 Santa Monica avenue.

PASSING OF LEANDER RITCHEY

On July 20, at the residence, 4680 Del Monte avenue, Leander Ritchey passed to the great beyond. He was the father of Mrs. Mary E. Gray of Ocean Beach; Evan D. Ritchey of Palo Alto, Calif.; Andrew E. Ritchey of Los Angeles; Clarence LeRoy Ritchey of Rock Island, Ill.; and Wesley Ritchey of Hotchkiss, Colo.; a native of Iowa, aged 43 years 8 months 12 days. Funeral services were held at the grave, Greenwood Memorial park, last Thursday morning.

CHURCH CHOIR ENTERTAINS AT DINNER-DANCE

Rev. and Mrs. W. F. Dawson of Ocean Beach, were among the special guests recently entertained at a dinner dance given at the Mission Beach Casino by Rev. C. T. Murphy, rector of All Saints church, and the choir of that church.

CARD OF THANKS

I wish to thank all the ladies who so kindly remembered me with a shower of so many useful things after the loss of my home.

I desire also to express my appreciation to Mrs. Grant, who acted as hostess.

MRS. N. B. MOODY,
4767 Voltaire St., Ocean Beach.

RELATIVES HONORED AT FAMILY REUNION

Mrs. Ella Custer and daughter, Mrs. June Cooper, entertained the other members of their family last Saturday, July 17. Fifteen guests sat down to a delicious dinner in their cottage at Los Nidos Court. The celebration was in honor of a couple of birthdays and a wedding anniversary of different members of the family. Those in the party were Mr. and Mrs. H. B. Parkinson, Dr. and Mrs. H. M. Funk, Miss Glen Funk, Dr. Hiram Funk, Miss Elizabeth Siebert, Mr. and Mrs. Claude Stout, Mr. and Mrs. Chas. Scott, Mrs. Aggie Brown, Claude Burton Brown, Mrs. Ella H. Custer and Mrs. Jane Cooper.

MAKES PUMPING UP

TIRES UNNECESSARY

Chicago, Ill.—F. E. Hughes, Suite 553-F, 424 N. Norman avenue, of this city, has perfected a new air-tight valve cap that enables auto owners to pump up their tires once and never touch them again until punctured or worn out. Leading tire manufacturers, after thorough tests, have approved Mr. Hughes' invention and banished the old theory that air escapes through rubber. One inflation lasts the life of a tire, and tire mileage is doubled. These caps retail for \$1.25 for set of five. The inventor wants agents and will send proof and sample free. Write him today.—adv.

VACATION BIBLE SCHOOL

The vacation Bible school held in the Baptist church will close its four weeks' session on Friday evening, July 30, at 7:30 p. m. The school will present a program of music, memory drills and dramatics. There will also be an exhibition of handwork done by the pupils.

Parents and friends are invited to attend the school any morning from 9 to 12 noon.

Patrolman Frank Bowe of the Ocean Beach police sub-station, recently recovered two automobiles, arrested four sailors and notified the owners of the machines that their autos had been recovered before they knew they had been stolen. The men gave their names as Charles E. Griffith, 21, Harry H. Byrd, 18, K. H. James, 17, and H. E. Young, 17.

SCHOOL DAYS

SOMETHING TO THINK ABOUT

By F. A. WALKER

WASTING PRECIOUS TIME

THE pleasure-loving young men and women who form the harmful habit of loafing when there is work to be done, or waste precious time in pursuit of vanities, are taking great chances with their future.

Although they may not, in the springtime of life, be apostles of laxity, there will come a day, if they persist in indifference, when they will be recognized as such, and everywhere shunned.

No man or woman can attain cleverness, alertness, and brightness of mind while living in a drowsy enervating atmosphere.

Each day ambition drops a little lower, ideals which were once clear and beautiful, become dim and uninviting.

You may imagine that there is no particular peril in dropping important duties and sneaking away somewhere to smoke a cigarette, but if on return to your desk you will reflect a moment, and impartially examine yourself, you will find that something has been permanently lost.

The continuity of thought has been broken, the threads are awry, frequently very much tangled, and often five, ten or fifteen minutes are required to get the mind going in the smoothly, easy running gait it was moving when you stepped out to steal the coveted puff.

The youth who, in the beginning, yields somewhat timidly to such temptations, decides after frequent repetitions that he or she is taking no undue liberty. With this thought come the good by to self-respect, and the proffering of the glad-hand to bad habits.

It is not surprising that such youths make shipwrecks, but that any get to port.

And yet such persons are indignant if they fail to be promoted, or cannot leap up at one bound to the heights of proficiency.

For their own thoughtless, erring and untrue selves, they blame others.

So thinking, they lose their grip on self-respect, become unworthy of trust, sell their birthright for a mess of pottage and drift out to sea hopeless wrecks at a time they should be booming into port under full sail, strong, sunny and prosperous.

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says the dictionary isn't enough for some of the puzzles and you really need a thesaurus.

A GOOD LITTLE KID

By DOUGLAS MALLOCH

SHE makes lots of noise lots of times.

At times when you're trying to read;

She asks you for nickels and dimes

For things she can't possibly need.

She doesn't do things she is told.

And does do the things you forbid.

And all of the day you must scold—

And yet she's a good little kid.

Her noise—well, it's innocent noise.

It's healthy, and happy, and glad;

She's rough, she's as rough as the boys.

And yet—well, it's nothing that's bad.

She doesn't say "Yes, ma'am" and "sir"

The way that you wish that she did;

You're worried a bit over her—

And yet she's a good little kid.

We worry a lot over things

That really don't matter so much;

And then ends the day, and it brings

The night with its tendered touch.

Then down on your knees you will fall.

Forgetting the things that she did—

For deep in your heart, after all,

You know she's a good little kid.

A LITTLE BURLESQUE DRAMA

By BERNARD G. GUERNEY

(c) 1926, Western Newspaper Union.

AT THAT spot where Second avenue (the Fifth of the East side) impinges upon Houston street (the East side analogue of Forty-second) you will find two buildings juxtaposed side by side in incongruous, yet unremarked, contrast.

Since the region is most decidedly Hebrew, let us defer to its clamorous insistencies and consider them from right to left. The first, then, is an old, age-grayed, solemn, bleak edifice; its notices appeal in vain to the heedless passers-by; and its doors, generally open for free ingress, rarely entice any chance worshippers. For it is a house for worship and, as though by a most incisive stroke of irony, named after one of the most austere and sainted fathers of the church.

Its neighbor to the left is new, gaudy and gay, with a crude yet contagious gaiety of color and light; its dabs of overemphasized femininity always draw avid eyes; there is a scale of prices for admission, and yet its doors are thronged, twice a day, by the eager faithful. For, though the place is a roof-garden, of sorts, yet is there a curious consanguinity between it and its sedate neighbor; for there was a time of old when the worship of beauty and sex was an actual cult; and is there not, to this day, something of theatricalism in chanting processions, and swaying censers, and richly brodered chasubles?

And thither, in quest of what adventures none knows, one night came Vanny—an affectionate contraction of the aristocratic prefix Van; the last name does not matter. It may have been the restlessness of youth; or satiation with the chorus beauties of Broadway, of whom he could—and did—have his pick; or atavism, for his family fortune had sprung from tugs that plowed the East river. Whatever his urgings, Vanny stumbled upon this "burlesque" house, and it became his secret, nightly haunt.

Strong indeed is the man that has no need of a confidant. Vanny was no weakling; yet eventually there came a day when he sought a confessor—and I was the one he favored.

It is necessary, for a full understanding of the denouement of this little drama, to mention a theme in the philosophy of life that has been but little dwelt upon—such is its obviousness. In the callow days of my youth I took the eternal verities to be mere beaten short-cuts that lead to anything but the truth; I derided the theories of environment and circumstances; for I held that a lily was always a lily, no matter what soil its roots might be nourished in; that a gem was always a gem, even upon a dunghill. But with the years I found that age does not impair truth; I found that water always seeks its own level; that scum will rise to the top; that the lees of even the sweetest wine are bitter; that all men and things have their foreordained places, as in a vast pattern—whose entire design, however, we may but impotently surmise from our little colga of web and woof.

And so, when Vanny began to speak of all this talk of the laxity of morals among the men—and the women—of the stage being no worse than the people in front of the curtain, and so on, I could but pity him.

"The trouble with you," he said, "is that you are in the same groove with all the other critics; every word you write is influenced by reputations—forgetting what windy affairs they are; no good can come from anywhere save Broadway, to you. If this girl were in the Follies, now..."

And so Vanny and I found ourselves seated in the cheap, garish East side music hall. The lights flared into full glow, the music blared forth; the impossibly-perspectived curtain rolled up, and the chorus trooped out on the boards. The show was on.

The chorus was no exception to the general run of burlesque choruses. Neither youth, beauty, grace nor voice seemed to be strict requirements, though they may not have been entirely absent; the all-important requisite was that they all be GIRLS; and it is a poor creature indeed that would have no point of mulchery to emphasize her appeal to that more than cosmopolitan audience; the chorus was of the widest variety as to race, age, type and ability, but they were all indubitably GIRLS; GIRLS!!! GIRLS!!! As for their work, who doesn't know it? Half-hearted gesturings like calisthenics, hackneyed choreographic evolutions, raucous echoes of noisy principals. And all of them with hard mouths, with harsh, worn lines about their eyes; all brazen with a brazenness that moved one to pity for their forfeited heritage of womanhood. They had found their level; they belonged.

And then, after the first confirmatory glance, I looked, as instructed, for the third girl from the left, second row—and gripped my binoculars. Vanny was vindicated, for she was the one exception.

She was a breath from the fields, brought to some mean den; a gleam of moonlight breaking through a narrow window into some noisome prison. Her makeup and tawdry costume were matters apart from her; the dubious symbolism of certain business lost all its equivoque when filtered through her purity. She seemed all that was good and pure, among all that was

evil and foul. She didn't belong.

It was during the intermission, as we stood on the huge fire escape flecking our cigarettes against the somberness of the neighboring church, that Vanny volunteered information, trite unto unbelief. She was unschooled, of course. A weakling father, a mother that had run away; a horde of little brothers and sisters to be fed, clothed and schooled. Only two means offered decent wages: this—and the other. And she fought shy of all men—even of him, Vanny.

Yet what could one do save repeat the old, old truism of common sense, albeit the consequences of touching pitch, and apples not falling far from their mother-trees? To this day I do not know, and I do not think Vanny himself knows, what made him heed our words. Was it the cowardice of caution, or a chivalrous, quixotic belief in the inherent goodness of the girl? For heed our Machiavellian advice he did. We merely counseled delay. Surely, if she were such a splendid girl, she could not be affected by a year of any environment. And would it not be a tacit admission of her possible weakness to rush to her—not rescue—assistance, say? For her sake he ought to be certain it was not mere infatuation.

For a year I received snapshots of Vanny from all parts of the world; but always they showed the expression of one haunted by memories—or was it doubts? An expression of one dissatisfied and in constant quest.

And when the year was over, almost to a day, we were again in a music hall, just as cheap and garish, but this time in Harlem. It was pitiful to watch Vanny, as he fidgeted, mopped his face and continuously consulted the typewritten report of the detective agency that had kept track of the girl's whereabouts.

He could not find her at first; when he did simultaneously with me—I would have given a great deal to have been spared the sight of the blanched and distorted face, and still more, perhaps, not to have seen her.

She had gained the first row now; her mouth was hard; there were harsh, worn lines about her eyes; she was brazen with a brazenness that moved one to pity for her forfeited heritage of womanhood.

She belonged. To ply him with drink was the best service in friendship and mercy to Vanny that night; to let him drink, till stupor and sleep silenced his cry, repeated endlessly and in a daze: "Oh, why didn't she die, why didn't she die?" For he would awaken soon enough to a realization of the eternal verities; that water seeks its level; that they that touch pitch shall be defiled; that the lees of the sweetest wine are the bitterest.

Violin, Like Mankind, Has Varying Moods

It is an old saying that a thoroughly healthy person is "fit as a fiddle," and, like many other old sayings, it contains an essential fallacy.

The health of a violin, or any other instrument, varies according to circumstances, and every player will tell you that there are days when his instrument fails to respond to his demands, often just when he himself is at his best.

The violin, in particular, is a delicate instrument that requires to be wrapped in silk or some other fine dry material to prevent it getting cold or being seriously affected by the heat.

It will become almost seriously indisposed in the course of an hour when being played in a hot room; it gets tired and out of sorts if it is played too continuously or too strenuously.

Good violinists prefer to have at least two reliable instruments, because they know that holidays are as necessary for the fiddles as for themselves, and sometimes just when they are busiest one of the fiddles gets overworked and must have a few days off. Keep "fit as a fiddle" if you can; but most of us wish to be fitter than a fiddle.

Never Satisfied

"Funny thing about highways," said a contractor who specializes in their construction. "People give them little attention as long as they are good, and when they are not there is nothing but kicking, with seldom an encouraging word of constructive criticism. Since the first concrete was laid in a road in this country, and that was in Bellefontaine, Ohio, in 1892, there has been put down more than 40,000 miles of 18-foot pavement. This has withstood all kinds of weather from a temperature of 119 in Arizona, to 45 degrees below zero at Bismarck, N. D. Why, in some places such roads have withstood temperature range of 155 degrees in a year. We are endeavoring in every way to abolish detours, the bane of the motorist's life. Repairing of roads has become scientific, and repairs are made without closing roads completely."—Detroit News.

Markings on Real Satsuma

A real old satsuma at first sight looks like ivory, and the designs display infinite care, the colors being low in tone, while the gold is penciled with such a multitude of minute lines as to be truly wonderful. The glaze is sometimes enameled in yellow and black. Real old satsuma may be identified by the mark of a string on the bottom or by the fact that the spiral in the paste goes from left to right. No real satsuma is marked except for these two characteristics. Many imitations of satsuma which are very valuable, especially koto and awata, are marked in Japanese letter or signs.

COULD NOT PUT ON HER SHOES

Mrs. Daugherty Was so Weak

In a little town of the middle West, was a discouraged woman. For four months she had been in such poor health that she could not stoop to put on her own shoes. Unable to do her work, unable to go out of doors or enjoy a friendly chat with her neighbors, life seemed dark indeed to Mrs. Daugherty.

Then one day, a booklet was left at her front door. Idly she turned the pages. Soon she was reading with quickened interest. The little booklet was filled with letters from women in conditions similar to hers who had found better health by taking Lydia E. Pinkham's Vegetable Compound.

"I began taking the Vegetable Compound," Mrs. Daugherty writes, "and after I took the third bottle, I found relief. I am on my eleventh bottle and I don't have that trouble any more, and feel like a different woman. I recommend the Vegetable Compound to everyone I see who has trouble like mine, and you can use these facts as a testimonial. I am willing to answer any letters from women asking about the Vegetable Compound."—Mrs. Ed. DAUGHERTY, 1308 Orchard Ave., Muscatine, Iowa.

THE WHY of SUPERSTITIONS

By H. IRVING KING

REASSEMBLING SNAKE

A SNAKE known as the "joint snake" can be cut into pieces, which pieces will reunite into a living snake. This belief is general throughout the United States. In some sections they have a variation of this to the effect that if any snake is cut into two pieces, the part that contains the head will swallow the tail part which will grow on again and the snake be as good as new. Those who believe in this reassembling snake superstition believe in it very thoroughly and regard it not as superstition but as an accepted fact in natural history. Question one of these closely, and while he has never seen the reassembling operation himself, he always knows of some one who has— which some one is generally either dead or "moved away," or if accessible, proves not really to have witnessed the phenomenon, but has it "on the best authority." This superstition is evidently an echo of the old mythological story of that great serpent called by the Egyptians Set—or Apepi and by the Greek's Typhon, the representative and embodiment of the powers of evil. In the Egyptian story Apepi is the great enemy of Osiris, the representative of the beneficent powers, and is at war with him. The myth in its Egyptian form is varied and inconsistent in many ways. The Egyptians in their religion were content to let contradictions and inconsistencies stand calmly side by side. But the gist of the story appears to be with regard to the great serpent that while he was slain by Horus—cut up, say some of the accounts—he reassembled and, coming to life again, renewed the war of evil against righteousness. Here is a truth set forth in fable by Egyptian priests thousands of years ago and is the conflict of evil with good still endures, so, in the guise of a popular superstition, still lingers the myth in which the priests of Osiris clothed it.

(c) by McClure Newspaper Syndicate.

Mother's Cook Book

"To judge with candor and speak no wrong. The feeble to support against the strong. To soothe the wretched and the poor to feed. Will cover many an idle, foolish deed."

A SYMPOSIUM OF SALADS

SALADS may be made from small amounts of various foods, so arranged and garnished that they are most inviting in appearance.

New Carrot Salad. Dissolve one-half package of lemonade jello and put to cool in shallow pan, so that it may be cut into small cubes when thick. Grate a cupful of fresh carrot, add a tablespoonful of grated onion, and half a cupful of finely minced celery, mix with a good salad dressing and let stand in a cool place an hour to season. When ready to serve alternate heaps of the cubed lemon jello with the carrot mixture on lettuce; heap on a spoonful of mayonnaise and serve.

French Dressing. This is the simplest of all salad dressings and the easiest to prepare. Take good sweet olive oil, three tablespoonfuls to one of elder vinegar, add a pinch of salt, a dash of cayenne and a bit of powdered sugar. Beat with an egg beater until thick and well-blended. Adding chopped pepper, onion and minced parsley to French dressing makes a seasoning for salads which is most tasty.

Nellie Maxwell (c) 1926, Western Newspaper Union.

(c) by McClure Newspaper Syndicate.

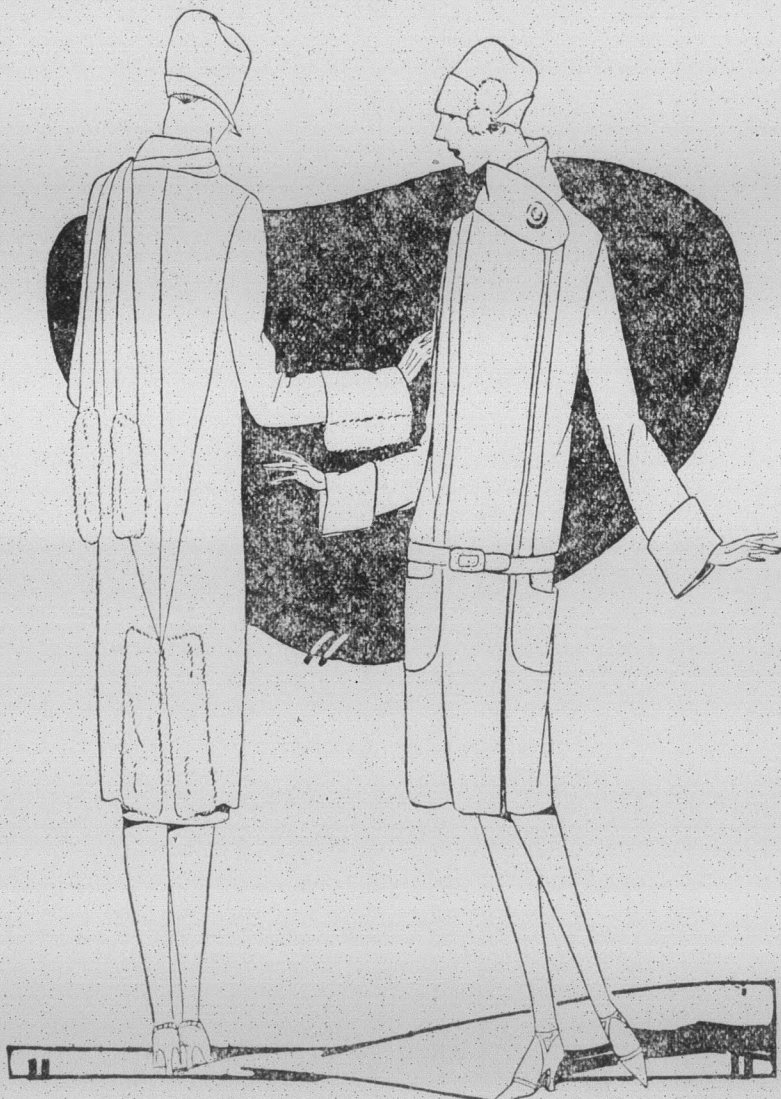

NEW FEATURES IN TRAVEL COATS; FADS AND FANCIES FOR SUMMER

THERE are travel coats and travel coats—for all sorts of journeyings—beginning with those rough-and-ready tweeds and Scotch woven fabrics that will stand much hard usage and ending with twills, almost equally hardy, but less simply designed. Now is the season when all the world goes traveling and Paris undertakes to meet every need of the tourist and to see to it that every coat is chic and interesting.

Designers have been much helped out by new Scotch fabrics in soft colorings and with borders in tones of the same color. Besides these there are large, striking plaids in clear black and white, some ombre stripes and large, indistinct plaids in colors. All these figured fabrics are manipulated to make them decorative, as in striped coats with the stripes running round

outshine the others. Fashion has not developed a furor but has spread its attention over all accessories, giving each of them more or less attention. To scarfs and ties it has given more; but other neckwear, gloves, shoes, bags and costume jewelry bear the stamp of this season's vintage of new fancies.

There is a fad for crystal jewelry. Short necklaces of crystal rondelles interspersed with black or colored beads, combinations of crystal and rhinestones in collars and bracelets to match, chokers of rock crystal and delicate earrings of crystal and rhinestones are worn with many costumes. They are cool and elegant looking. Besides, white crystals the aquamarine finds itself approved and in increasing demand. The beautiful and delicate "grotto blue" is lovely in sparkling

TWO DESIGNS FROM PARIS

the figure and panels, or pockets, collar and cuffs, with vertical stripes. Large plaids, cut on the straight in the coat and on the bias in its accessories, achieve an effective decoration and bordered materials provide many opportunities to the designer. Fur collars and occasional other touches of fur are about the only things used outside the material in these smart utility coats, and the fur is chosen to harmonize with the color of the material. A coat which illustrates the use of fur is shown at the left of the sketch. It is made of a soft, gray coating cut with a pointed panel in the back and finished with a scarf. Natural squirrel fur finishes the scarf ends and accents the split at the back

cut-crystal beads used in necklaces and earrings. Earrings are nearly all in delicate patterns, whatever the medium used for making them. Hoops of rhinestones are liked and find themselves in the company of rhinestone pins with the initial and monogram types the most fashionable. Some very interesting masquerade pins are shown in metal and in rhinestones. Flexible, linked collars and bracelets to match and stone-set bracelets are equally popular. In watches the square and oblong patterns in many varieties are most fashionable.

The story of gloves is short; the one-button type with novelty wrist and the graceful slip-on, in fabric, or

HOT PACK CANNING REDUCES SPOILAGE

Method Found to Be Quick and Easy to Operate.

(Prepared by the United States Department of Agriculture.)
Hot pack canning is the feature of a bulletin by Dr. Louise Stanley just issued by the United States Department of Agriculture telling how to can fruits and vegetables in the home. The hot pack is a quick and easy method which combines all the good points of the other popular methods and has some additional advantages of its own.

Briefly, the hot pack method is to wash and otherwise prepare the vegetable or fruit for canning, cook it for ten or fifteen minutes in water or syrup in a kettle, pack it boiling hot into the glass jars or tin cans, and process in the water bath or pressure canner according to the time and temperature recommended. This short pre-cooking of the fruit or vegetable wilts and shrinks it so that it can be packed more easily. It drives out the air and makes exhausting unnecessary. Most important of all, the food packed boiling hot into the jars or cans and put at once into the hot canner reaches the temperature required for processing far sooner than if it were packed cold, and makes possible shorter processing periods. Moreover, heat penetrates more uniformly during canning and the food in the center of the jar is more likely to be properly processed. This cuts down the chances of spoilage, for it is proper processing more than all else that determines whether canned foods keep or spoil.

The directions given throughout the bulletin are concise. Wherever possible the scientific reasons behind them are stated so that the homemaker will understand why she must follow directions if she wants to put up foods that will keep. Types of water-bath canners for use with fruits and tomatoes and pressure canners for use with all other vegetables are described and illustrated. A series of pictures and brief statements give the steps in canning in glass jars and tin cans. Directions and timetables for handling the various fruits and vegetables from apples to strawberries and from asparagus to sweet potatoes are included. Requests should be made to the United States Department of Agriculture, Washington, D. C., for Farmers' Bulletin 1971-F, "Canning Fruits and Vegetables at Home."

To Wash Berries

Not every one knows how to wash strawberries. Hull a few berries at a time, drop them in a bowl of clean, cold water, and take them out immediately. Put them to drain dry in a colander. The sand sinks to the bottom of the bowl and the juice does not have a chance to run. Continue hulling and washing a few berries at a time. If you turn a whole quart of berries into a bowl at once, some will be watery and tasteless before all are taken out. If you put them in a colander and run water on them the sand from those above gets on those beneath.

Egg Dressing Used in Place of Oil in Salads

Hot slaw with egg dressing is particularly acceptable to those who do not like the flavor of oil in salads. The ingredients you will need are: 2 eggs, 4 tablespoonfuls water or cubed stock, 3 tablespoonfuls vinegar or to taste; 2 tablespoonfuls shredded green pepper or 1 teaspoonful onion juice, or 1/4 teaspoonful celery seed, 1 teaspoonful salt, a few specks of dry mustard, 1/2 a medium head of cabbage—about 1 quart; a tablespoonful sugar.

Shred the raw cabbage finely. Beat the eggs well, add the salt, sugar, mustard, and water or stock; cook in the double boiler until it coats the edge of the spoon, thickening like a soft custard. Then add the vinegar, and pour it over the cabbage while it is still very hot. Let it stand a few moments to blend the flavor of the dressing with that of the cabbage. This may be served cold as well as hot. The United States Department of Agriculture states that the egg yolks used in this dressing contribute iron, fat, and other valuable constituents to the diet, and that the raw cabbage itself is one of the best foods we have as a source of vitamins, so let the family enjoy this good slaw frequently.

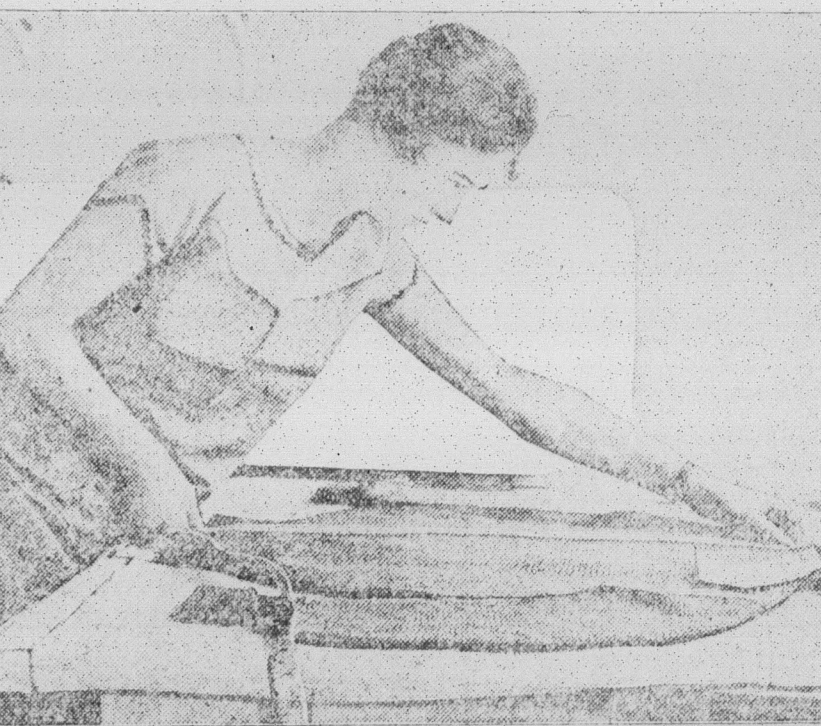

Color Fastness Depends on Chemical Composition

It is a common fallacy that green, lavender, or some other color is less fast than blue or pink. Fastness depends on the chemical composition of the dye used, not on the color, states the United States Department of Agriculture. Dyestuffs are grouped into various classes according to their composition, and the dyes in some classes are more fast than those in others. Thus, a green, blue, or any other fabric may have received its color from any one of a number of different dyestuffs varying widely in permanency. Without knowing just what kind of a dye was used—and it is practically impossible for the consumer to tell this—the fastness of color in two fabrics cannot be predicted. A dye that is one of the poorest of its class may have been used on one of the fabrics, while the other may have been dyed with one of the best.

Hen Beats Doctor as a Mixer of Spring Tonic

Egg-yolk heads the list of iron-rich foods and is one of the best possible means of supplying the body with this valuable mineral, says the United States Department of Agriculture. It contains phosphorus and calcium, too, elements needed to build bones, teeth, and other tissues. The white of eggs come very near to being pure protein, which is one of the chief substances of our bodies. Eggs are also rich sources of vitamins, those A, B, C's of the diet needed to promote health and proper development. Taken all and all, then, the hen beats the doctor as a mixer of spring tonic, for she combines minerals with other valuable foods in a form that the body finds particularly useful.

WASHING SWEATERS AND OTHER WOOLENS

Measuring a Sweater After Washing.

(Prepared by the United States Department of Agriculture.)

Woolen sweaters, scarfs, and other knitted and crocheted articles often lose their shape when washed, unless special precautions are taken. Before washing a sweater, you should measure it carefully both lengthwise and crosswise, and measure the length of the sleeves. When you are ready to dry it, spread it on a table covered with several thicknesses of clean, soft material and shape it according to the dimensions taken before it was wet. Pin it in place if necessary.

Use Lukewarm Soda.

Use lukewarm soda, about 110 degrees Fahrenheit, for washing sweaters or any woolen material, and water of the same temperature for rinsing, say the textile specialists of the United States Department of Agriculture. Never boil any kind of woolens, and if you soak them, let it be for a very short time, if at all. Neutral soaps are best. Never use strong washing powder, or water that has been softened by strong alkaline compounds. Borax and ammonia solutions are the safest assisting agents if the water is hard. Use soda in the form of a

solution or jelly. Do not rub cake soap directly on the sweater. Have an abundance of suds, and use more water in proportion to the bulk of the sweater than you would for a garment not made of wool.

Don't Rub Sweater.

Squeeze and work the sweater in the suds without rubbing it. Press out the excess water and wash the sweater in a second sud of the same temperature. Hand washing is considered less likely than machine washing to shrink a sweater or make it lose its softness. Squeeze the last suds from the sweater and rinse it free from soap in several changes of lukewarm water. Wring it through a loosely set wringer, taking care not to stretch it.

Spread it, back down, on a covered table in a warm place, but not near a fire or in the direct sunlight. In winter, never allow a sweater to freeze. Dry it indoors. Shape it according to the original measurements, as described before. Turn it occasionally after it is almost dry. A child's sweater may be dried on a form. Keep a sweater in a drawer or on a well-shaped hanger, never on a hook.

A spray a day - keeps skeets away

DON'T let mosquitoes ruin your summer. Keep your bed rooms free from all insects. Spray Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

Keeps Buffaloes on Run
Buffaloes belonging to Mahlon N. Haines of York, Pa., are "off their feed." They need exercise, but no one could be found who would enter the enclosure and chase them around. So Karl S. Ott has been retained to exercise the animals by using his airplane. He flies over the field, which causes the buffaloes to run about.

Cuticura Comforts Baby's Skin
When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

Brides in Training
Special "bride" courses are offered by the British Y. M. C. A., and many young Englishwomen who will soon figure as principals in weddings are in training. Specialists in domestic science and home economics give lectures on home equipment, marketing, accountancy and allied subjects. Consultants are provided who visit future homes with bride and advise in regard to their arrangement.

Wanted—Gleaze, oil station or other bus that 25,000 will handle. (Give price, details.) Rm. 4229, 629-Mkt. St., San Fran 1820.—A43.

Flower-Lit
In June and early July, the most constant lights of the night are the pale midsummer blossoms. The glory of the moon and stars is cut short by late sunsets and early dawns; and the Plough, which is the genius of night in our northern skies, has scarcely begun to swing low across the north, as best we know it, before it is spangled out by morning. But as soon as the twilight falls, whether the night be fair or cloudy, the white flowers shine forth in the meadows and about the woodsides, and earth stands lit till morning with their drowsier stars and moons.—Anthony Collett, in "The Changing Year."

Alight the eyelids with Roman Eye Balsam at night, and see how refreshed and strengthened your eyes are in the morning. Send now to 372 Pearl St., N. Y. Ave.

Literally
Visitor—I see you are putting up many new buildings in these parts.
Workman—Yes, sir. New buildings is the only kind we puts up.

Love at first sight is hazardous—if one isn't a very good judge of character.

Off His Mental Chow
The cruising college sailing from New York next October will be on the high seas for the greater part of eight months. One can hear some of the less rugged scholars even now feebly piping: "Steward, I don't feel well enough for the whole economics course; just serve me one page of Greek and an orange in my stateroom, please."—New York Sun.

Your shoes feel easy if you use ALLEN'S FOOT-EASE

Stops the pain of Corns and Bunions and you can walk all day in ease and comfort. Nothing gives such relief to hot, tired, aching, inflamed or swollen feet, blisters or calluses. A little ALLEN'S FOOT-EASE, sprinkled in each shoe in the morning will make you forget about tight shoes. It takes the friction from the shoe. Always use it for dancing and to break in new shoes. For Free sample and a Foot-Ease Walking Doll, address ALLEN'S FOOT-EASE, Le Roy, N. Y.

Artificial Diamonds
At the Roehling steel works, in Wetzlar, Germany, artificial diamonds are being made with some degree of economic success. The diamonds are within a fraction of the hardness of true diamonds, being 9.9 as compared with 10 for genuine stones. The artificial gems are made of an alloy of wolframite and compare in work and luster favorably with genuine diamonds. The cost of manufacturing them is said to be reasonable on a commercial scale.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

IN TUNE WITH SUMMER

which extends from the end of the pointed panel to the bottom of the coat and provides plenty of freedom for walking.

Twill in navy or beige is popular for the travel coat and Drexell contributes an ideal model in the coat shown at the right of the sketch. It also has a short scarf collar and is a double-breasted, straight-line model in which the gray leather belt and single button fastening are decorative. The management of the pockets is particularly clever and the design is well adapted to the striped and plaid fabrics as well as to plain cloths.

Among the various pretty furbelows that are called upon to finish off the summer costume, no one particular item has overshadowed or

In washable doeskin, are preferred. Sometimes the gauntlet cuffs in these styles are embroidered and nearly always they are scalloped. In fans old French types have been revived and the ostrich feather fan maintains its hold. Parasols are mainly represented by Japanese imports of oiled paper and bamboo or wooden handles. They are semitransparent and artfully colored and they have fascinating decorations of painted figures and floral patterns. The one important rival of these sports sunshades, of which an example is pictured here, are those short, rain-or-shine affairs made of rubberized silk, with fancy handles short enough to be carried in a suitcase.

Architects! Home Builders!

Don't Leave Out The Outlets

The demands for Electricity for household use have become so numerous that a standardized plan for wiring has been adopted.

This is called the Red Seal Plan.

It calls for light outlets of proper size in the proper places --- it calls for convenient connections for the electrical appliances used in all up-to-date homes. In short, the Red Seal Plan means convenient and adequate electric wiring.

STRAIGHT TALKS WITH AUNT EMMY

On How to Lose Your Inheritance

"It is so hard for me to get along on what John left me," complained Mrs. Norris to Aunt Emmy. "Junior wants to get a job, but I always wanted him to go to college."

"Yes, yes, I know," interrupted Aunt Emmy. "but what about this mining stock?"

"I'm coming to that. You see I thought I could invest some of those bonds John left, they yield such a tiny income, in something that would bring real money. I needed more money, so when the telephone rang that day and a man, he had the nicest voice, said he had been referred to me by a friend and wanted to talk over some gilt-edged investments, I told him to come right up."

"His name was Mr. Stanhope. He was so nice. He told me all about the big money people are making in platinum mines. Platinum jewelry is so fashionable now. He said he could let me have some stock in a wonderful mine, and that the company would buy the stock back if I ever wanted my money."

"Have you a statement signed by one of the officers of the mining company to the effect that the company will repurchase your stock?" asked Aunt Emmy.

"Why no—"

"Well, you will have trouble getting your money back. A company cannot be compelled to buy its own stock back."

"Oh, I don't know. Anyhow, I got out my bonds and showed them to him—"

"What, you keep your bonds in the house instead of at the bank!" exclaimed Aunt Emmy.

"Why, yes, but in a box that locks—"

and Mr. Stanhope said that he was surprised that a woman with the good business judgment I had should be getting such a small income as those bonds paid—scarcely anything. He said that I should make my money work harder for me. He knew I must have good business judgment, he said, because I brought my children up so beautifully. He offered to take the bonds and change them for his stock."

"Oh, Lord!" exclaimed Aunt Emmy, "did he give you a receipt?"

"Why, of course, he was the nicest man. But Junior said after he left that he didn't like him. He said he looked slick. Boys are so funny. Well, I got the platinum stock but Mr. Barnes at the bank says it's no good. He must be mistaken. But I want my bonds back so I came to you for help. And you're always so lucky about your investments."

"Not lucky, just sensible," corrected Aunt Emmy. "Why, oh why, don't you consult your banker, who understands finance before you risk your money? This is not your first loss. Remember that piece of land you bought that was under water?"

"That was different," said Mrs. Norris blushing, "and anyway, Mr. Stanhope is honest, I can tell that."

"If he were honest, he would not have promised you the things he promised. Reputable houses don't send out representatives who make promises about repurchase of stock. Why don't you 'phone your Mr. Stanhope?"

"I did, but he's out of town. I've written, too, but I suppose I shall have to wait until he gets back. It's been several weeks now, so he should be back soon."

Just then the evening paper came. Aunt Emmy glanced at it, then read it attentively. Her expression grew serious. She handed the paper to Mrs. Norris. On the front page was an account of a financial scandal. The house that sold Mrs. Norris her mining stock was involved and the men who ran the business had been indicted for fraud.—A. B. Ayres.

AMERICAN YOUTH

Elizabeth ("Betty") Clark, 13, of Cedars, Delaware, is one of that state's girl candidates for the American Youth Award, established by the directors of the Sesqui-Centennial International Exposition, to be held at Philadelphia from June 1 to December 1 in observance of 150 years of American Independence. If "Betty" is finally chosen to represent Delaware she will be given a week's trip to the Exposition and to Washington and the White House, where she will receive a medal from the hands of President Coolidge.

DAY CAMP FOR BOYS

OPENED ON BAY FRONT
AT MISSION BEACH

Open camp to visitors was held this week at the boys' camp at Mission Beach, conducted by Frank Y. Van Valin, principal of Grant school, and Walter Davis, former coach at the high school, at present connected with the coaching staff of the University of Arizona.

The camp is a day camp conducted six days a week, with a varied program each day, including swimming, canoeing, sailing, aquaplaning, outboard motoring, surfboard riding, fishing and land sports. Boys who desire coaching in academic subjects have an hour set aside each morning.

Kodak Films—Froide—Bacon St.

Mason County, Michigan, bankers are pushing hard to replace scrub stock with pure-bred cattle. The plan as outlined by the county agent is to purchase young pure-bred sires and place them wherever a farmer is found who is willing to co-operate in the proposition. The bankers will advance the purchase price and take a note for one year without interest. The idea is to make it as easy as possible for the farmers to procure thoroughbreds.
